

COVID-19

Research PLASMA

SARS-COV-2

IgM and IgG antibody-positive plasma
for in-vitro research and manufacturing

• Direct Sales • Global Shipping • Donor Clinical History
Corresponding serum & saliva samples may be available from selected donors

PlasmaLabTM

INTERNATIONAL

As nations worldwide respond to the COVID19 pandemic, the research community continues to study the SARS-COV-2 virus to find a cure and/or vaccine.

PlasmaLab International stands prepared to support that research and fulfill orders for SARS-COV-2 antibody-positive and antibody-negative plasma.

We have a biorepository of SARS-COV-2 antibody-positive plasma collected from recovered COVID19 donors with confirmed positive PCR test results. All COVID19 plasma units have been tested and confirmed positive for SARS-COV-2 IgG antibodies. Units confirmed positive for SARS-COV-2 IgM antibodies are also available. Corresponding serum and saliva samples may be available from selected donors.

Additionally, we have units of plasma collected prior to COVID19 infection from a limited number of donors.

Sample donor clinical history sheets are included in this PDF.

We take pride in providing cost-effective, time-saving direct sales to our customers. Global cold storage shipping and expedited fulfillment of orders are available.

PlasmaLab International also offers a wide variety of allergy and other immune disorder products. Please contact us for information and see our catalog for a sampling of our IgE-positive products:

www.plasmalab.com/2-ml-and-10-ml-allergic-ige-postive-human-plasma-catalog

If you have a need for any of our products or services, please contact us at 1-425-258-3653 or PlasmaLab@plasmalab.com.

Thank you for considering PlasmaLab International as your source for antibody research.

Safet Ibisevic, CEO
PlasmaLab International

Clinical History

<i>PLI Permanent ID</i>	9715-PK
<i>Gender</i>	Male
<i>Birth Year</i>	1955
<i>Ethnicity</i>	Caucasian
<i>Blood Type (if available)</i>	Not available
<i>Diagnosis</i>	Post-COVID19 Infection (Recovered)
<i>Onset of Symptoms</i>	29-Feb-2020
<i>Resolution of Symptoms</i>	15-Mar-2020
<i>Date of PCR Test</i>	03-Mar-2020
<i>Results of Lab Test</i>	Positive SARS-CoV-2 PCR-RT
<i>SARS-CoV-2 Antibody</i>	Positive (5-May-2020)
<i>Methodology</i>	Immunoassay
<i>Additional information</i>	Plasma available on this donor prior to his diagnosis of COVID19.

Each plasma unit has been confirmed negative for antibodies to HIV and HCV, non-reactive for HBsAG, and non-reactive for HIV-1 RNA, HCV RNA, and HBV DNA by FDA-licensed tests.

FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.

Clinical History

<i>PLI Permanent ID</i>	33971-DK
<i>Gender</i>	Male
<i>Birth Year</i>	1961
<i>Ethnicity</i>	Caucasian
<i>Blood Type (if available)</i>	Not available
<i>Diagnosis</i>	Post-COVID19 Infection (Recovered)
<i>Onset of Symptoms</i>	02/20/2020
<i>Resolution of Symptoms</i>	03/09/2020
<i>Date of PCR Test</i>	02/29/2020
<i>Results of Lab Test</i>	Positive SARS-CoV-2 PCR-RT
<i>SARS-CoV-2 Antibody</i>	Positive (5-May-2020)
<i>Methodology</i>	Immunoassay
<i>Additional information</i>	N/A

Each plasma unit has been confirmed negative for antibodies to HIV and HCV, non-reactive for HBsAG, and non-reactive for HIV-1 RNA, HCV RNA, and HBV DNA by FDA-licensed tests.

FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.

Clinical History

<i>PLI Permanent ID</i>	33975-PP
<i>Gender</i>	Male
<i>Birth Year</i>	1966
<i>Ethnicity</i>	Asian
<i>Blood Type (if available)</i>	Not Known
<i>Diagnosis</i>	Post-COVID19 Infection (Recovered)
<i>Onset of Symptoms</i>	03/09/2020
<i>Resolution of Symptoms</i>	3/26/2020
<i>Date(s) of Lab Test(s)</i>	3/23/2020
<i>Results of Lab Test(s)</i>	Positive SARS-CoV-2, NAA
<i>Additional information</i>	

Each plasma unit has been confirmed negative for antibodies to HIV and HCV, non-reactive for HBsAG, and non-reactive for HIV-1 RNA, HCV RNA, and HBV DNA by FDA-licensed tests.

FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.

Clinical History

<i>PLI Permanent ID</i>	33976-PP
<i>Gender</i>	Female
<i>Birth Year</i>	1966
<i>Ethnicity</i>	Caucasian
<i>Blood Type (if available)</i>	Not Known
<i>Diagnosis</i>	Post-COVID19 Infection (Recovered)
<i>Onset of Symptoms</i>	03/16/2020
<i>Resolution of Symptoms</i>	03/29/2020
<i>Date(s) of Lab Test(s)</i>	03/23/2020
<i>Results of Lab Test(s)</i>	Positive SARS-CoV-2, NAA
<i>Additional information</i>	N/A

Each plasma unit has been confirmed negative for antibodies to HIV and HCV, non-reactive for HBsAG, and non-reactive for HIV-1 RNA, HCV RNA, and HBV DNA by FDA-licensed tests.

FOR RESEARCH USE ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.

Clinical History

<i>PLI Permanent ID</i>	33980-PW
<i>Gender</i>	Female
<i>Birth Year</i>	1967
